

Evidence for the Bible's Trustworthiness

The reliability of the Holy Scriptures is a foundational truth of the Christian faith. The Bible is not merely a collection of ancient writings but the divinely inspired Word of God, preserved through providence and attested by various forms of evidence. In a world where skepticism about the Bible's authenticity persists, serious Bible students need to understand the manifold evidence that affirms Scripture's trustworthiness.

This podcast will explore the biblical and historical evidence that underpins Scripture's reliability. We will examine archaeological findings that corroborate biblical narratives, the remarkable preservation of the biblical text through centuries, and the internal consistency that points to divine inspiration. Our goal is to deepen faith and equip believers with a robust defense of the sacred Scriptures.

As the Psalmist declares, "The entirety of thy word is truth" (Psalm 119:160), so we approach this study with reverence and confidence that the Bible is indeed the sure foundation for faith and practice.
