

Genesis to Revelation: How Two Prophecies Frame the Entire Bible

The Bible begins and ends with prophecy, weaving together God's promises from the earliest chapters of Genesis to the final visions of Revelation. These first and last prophecies serve as bookends to the grand narrative of redemption. The opening prophecy introduces conflict between the seed of the woman and the serpent, promising ultimate victory. The closing prophecy reveals the consummation of God's plan in a new heaven and a new earth, accompanied by eternal fellowship with Him.

By studying these passages side by side, we see the coherence of God's purposes across Scripture, the hope He offers His people, and the certainty of His coming Kingdom.
